  Bachelor of Arts in Philology
  Anglistyka i J. Rosyjski

About me:

Highly motivated, self-taught javascript developer, with more than 2 years of non-commercial experience. Seeking a role in a company where I can continue to grow my skills and help fulfil business objectives.

Personal projects:

Eventzor

Typescript, Next.JS, TailwindCSS, MongoDB, Prisma

Create an account and post your event or item on the market. Like/dislike or comment on events and items of other users.

- Allows users to create, edit and delete Events and Market sell orders
- Created a "Comment" and "Like and Dislike" functionality
- Implemented a system that notifies users about likes, comments etc.
- Simple search feature enables fast queries across the app

Live: https://eventzor.vercel.app

Memory Game

Typescript, React, TailwindCSS, PokeApi

My attempt at Memory, an old children's game where the objective is to uncover matching cards in least possible amount of moves.

Repo: https://github.com/str4ng3love/memory-game
Live: https://match-game-olive.vercel.app

Speed Typing Game

Vite, Typescript, React, TailwindCSS

A game that lets the player test their typing prowess. A random quote is fetched from quotable.io and displayed. The goal is to type in as many quotes as possible in allocated time frame (1 to 10 mins).

Repo: https://github.com/str4ng3love/speed-typing-game
Live: https://typing-checker-wine.vercel.app

Blogga

Javascript, CSS, EJS, Express, Mongoose, MongoDB

Simple application that allows users to create accounts and operate on posts.

- Implemented an Express application that performs CRUD operations on "POST" schema.
- Cookie-based sessions
- Created simple, responsive frontend with vanilla JS and CSS
